Web test 02

Some Highlights

- Course cannot be create
- Room cannot be created
- Could not find send message button for Admin and Teacher to send msg to student
- Certain parts is yet to test since course and room cannot be created

---

≔ Course (Not tested since cannot add course)

Bug 〇

- ○ course detail: "share" button no respond (should copy the page url for user to send to friends)
- ○ bought session not showing in cart

≔ eShop

Bug 〇

- ○ item detail: "share" button no respond > maybe just delete the button

---

≔ Contact

Bug 〇

- ○ after inserting "Latitude" and "Longitude", still no Google map display on the page

---

☰ Dashboard

Bug ⭕

- ◯ New: Room creation cannot complete
- ◯ New: Course creation cannot complete

☰ Menu / Inbox

Bug ⭕

- ◯ <for Admin / Teacher > How to create message and send to student?

☰ Menu / My Course **(Not tested since cannot add course)**
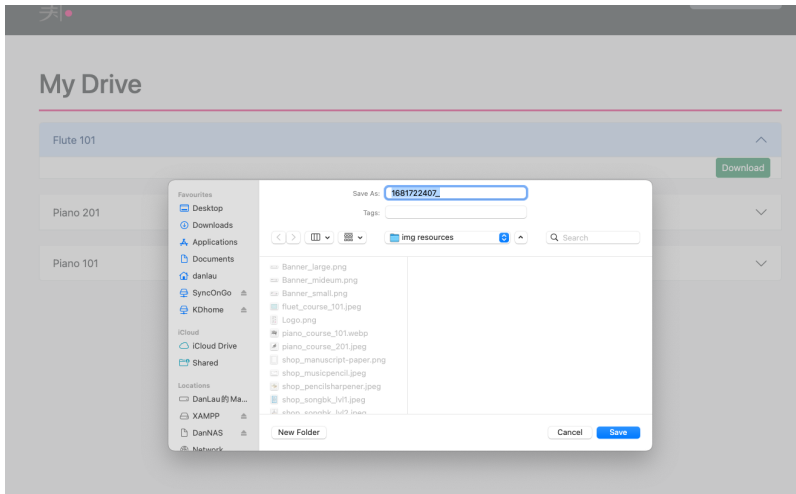

Bug ⭕

- ◯ Course time and upcoming course not aligned
  - In the original idea the course would be a cyclical class (i.e.: Every Tuesday) , so the "course time" is showing Monday, Wednesday or Saturday...etc. If a student bought a session, she can join in the coming date that the course took place (showing in "upcoming course", which will be automatically updated after every week, until the session count is out). But since now the design is using a static date showing in "Course time", so I think the "upcoming course" is no longer needed.

Suggestion 💡

- <Teacher>: My course should show all the courses belong to this teacher and students details who subscribed to that course?
- <admin>: My course should show all the courses belong to all related teacher and students?

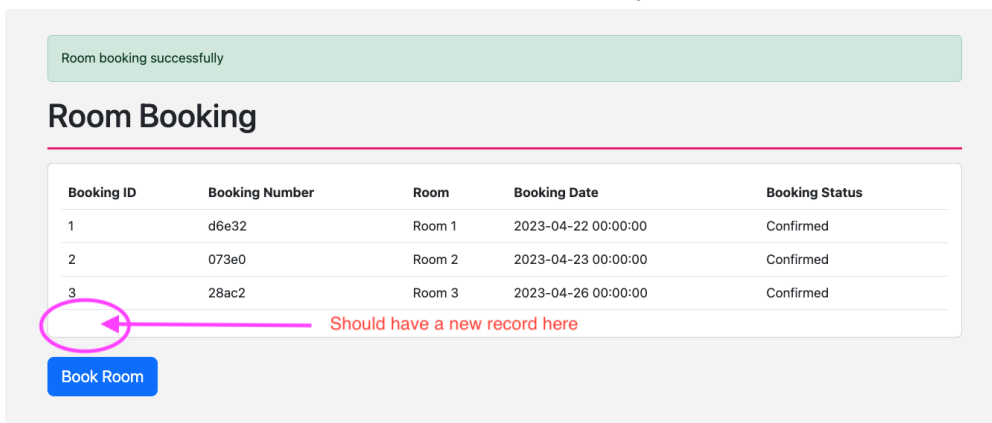

Bug ⭕

○ a download will pop up even there's nothing in the drive

○ <Teacher>: No upload / Delete button
○ <Admin>: No upload / Delete button

Bug ⭕

○ after added a room booking the new booking did not show up in the page (and also no related record on the DB side)

Suggestion 💡

- <admin>: admin should be able to change the booking status (Pending / Confirmed)
- <admin>: admin can delete booking
